Akos Gabossy, Founder and CEO of Paniq Room, about this project:

"Our goal was to build a very upscale escape room that lives up to the standards of the entertainment capital of the world, Las Vegas. It was a challenge to come up with unique puzzles and exciting story lines. We also wanted to create an environment which is very Instagram friendly and inspires younger generations. We also added a bar and lounge area, so players can discuss/process their experience and spend more time at PaniQ Room."
